

## Women’s Preventive Services

In response to the Women’s Preventive Services Act, certain birth control medications and prenatal vitamins will be covered at a zero (\$0) co-pay. The Plan will cover at least one form of Birth Control from each FDA approve method at 100%. Some medications may require specific criteria to be met as listed below.

**Please Note:**

Step Therapy is now required for Birth Control. A First Line Medication, from the same therapeutic class as the brand name drug within the previous 365 days, must be tried first. If your prescription history does not indicate that a first line medication was tried, the brand name medication will be covered at the non-preferred benefit. See chart below.

If an Individual’s Provider recommends a particular service or FDA approved item due to Medical Necessity, the Plan will defer to the determination of the Provider. Medical Necessity may include considerations such as severity of side effects, difference in permanence and reversibility of contraceptives, and ability to adhere to the appropriate use of the item or services.

**Medications that require the use of first line medications:**
